

Celebrate senior wellness month with your pet

Give your super senior the gift of good health...

We offer early detection packages for your senior and geriatric pets. These packages target the most common illnesses and ailments that senior pets encounter. If we catch them early (before your pet shows signs) many of these problems can be managed quicker, easier, and with less financial impact.

Call us for more details or to schedule an appointment!

We also have wellness packages for puppies, kittens and adult pets

Packages start at \$160 and cover all routine preventive care procedures such as the comprehensive physical exam and vaccines as well as provide additional information on health with early detection blood work.

Click our Services tab, and then choose early detection packages from the menu at the left to see a list of the packages offered.
